

#Tesla Takedown

Take Down Tesla: Tesla shares are plummeting, global sales are dropping, the giant is struggling, and we can help bring it down now. Tesla revenue is the backbone of Musk's empire. If Tesla falls, Elon falls!

Stop Musk Now: We must stop Musk! The super rich like Musk and Trump want to destroy democracies and communities worldwide. They interfere in elections and actively support right-wing parties. Previously hidden, now visible for all to witness: people and the environment are being exploited by the super rich. But we are fighting back!

Join the Protest: We stand in line with powerful protests against Tesla worldwide: actions against the opening and expansion of the plant near Berlin, widely supported labor struggles in Sweden and protests in many other places. Right now people are demonstrating in front of hundreds of Tesla stores in the USA. Now Tesla will feel our anger also in Europe!
